Westport, MA

RE: FW: Contracor's Work Plan
Robert May to: Kimberly Tisa

06/21/2011 05:13 PM

Will you be able to call me tomorrow to discuss new project in Westport, MA? We have high air sample results and some elevated dust wipes at a middle school where we have found PCB in caulking and glazing compounds at school. I have a meeting on Thursday with School Committee so need to discuss next steps presuming you may want us to have Congener specific reporting versus what we have now as homolog for the air samples. We had a high of 990 ng/m3. Lab is Con-test. If need to speak today will be on cell until 7pm.

Subject: Re: FW: Contracor's Work Plan

I believe the approval conditions state for "EPA review and/or approval." We don't need to approve the lab cert or the contractor's cert, but will be reviewing the contractor's work plan.

Kim,

I left a voice-mail but figured I would try to send this to you. If you require a formal paper submission, I will send to you. This is the selected contractor's work plan and acknowledgement of the notification for the Walpole Fisher Elementary School Auditorium floor removal project. Their plan includes a summary of process, worker training and their respiratory protection plan.

Please advise if we need to await an approval of this plan by EPA before proceeding with work since on the notification approval letter this is not stated. Tentative plan is to begin work on July 5th 2011, but I will confirm and provide you with a formal notification as required by the approval of our notification. If EPA must issue an approval of Contractor's plan before we can proceed we will schedule upon approval, likely within 2 weeks of approval.
